Subject: Microsoft settlement

Dear Sirs:

I think it is time to end this ordeal. It has been clear to me that this suit by the Justice department was a political move prompted by the competition of Microsoft. The settlement assures the completion that they will have a chance to compete with Microsoft. If their products succeed then that will be fine. But if their products do not succeed you will hear from them again saying Microsoft has done some naughty and they want protection and maybe even some money to support their egos.

Sincerely,
Jimmy Boyle
